LB-60 FIRE RESISTIVE MASTIC

DESCRIPTION

A tough, fire resistive, water vapor barrier, weather proof mastic designed to protect insulation system applied to equipment operating below ambient temperature.

LB-60 can be used on high density wool and fibrous glass, cork, polyurethane but cannot be used on polystyrene foam.

TECHNICAL DATA GENERAL PROPERTIES

| Colour | white |
|------------------------|--|
| Viscosity | soft paste |
| Specific gravity | 1.25 |
| Solids by weight | 60% |
| Service temp limits at | -40°C to 90°C |
| coated surface | |
| Water vapour permeance | .06 perm at 1.2 mm dry film thickness |
| RESISTIVE TO | |
| Weathering | excellent |
| Mineral oil | resist splashes |
| Solvents | resist splashes |
| Saline solutions | excellent |
| Diluted bases/ acid | excellent |
| APPLICATION | |
| Equipment | trowel, spatula |
| Coverage | initial coat: 1.0 sq m per kg 1 mm wet |
| | film thickness |
| | finish coat: 0.5 sq m per kg 2 mm wet |
| | film thickness |
| Drying time | superficially: 4 hours |
| | dry hard: 48 hours |
| Clean up solvent | xylol |
| HANDELLING AND STORAGE | |
| Flammability | Wet: flash point 41°C |
| - | Dry: fire resistive |
| | Store between 15°C to 35°C |

IMPORTANT

Contains volatile flammable solvent. Allow adequate ventilation. Keep away from heat and open flame. The mastic thickness if exposed to cold weather. Before use they should be stored in a warm place. When stored in a cool dry place usable life is one year.
